**MARITIME SERVICE
FROM ONE SOURCE**

YOUR PLUS+

Lehmann

Lübeck · Germany · Baltic Sea

The shipping company Reederei Lehmann

Lehmann has been going to sea since the 1950s. From the outset the company invested in the continuous expansion of the fleet: whereas the distinctive green ships were at first primarily at home in the European coastal trade, today modern mini-bulkers are under way in the worldwide tramp trade.

The fleet is thereby flexibly adapted to market requirements and customer wishes. Cargo of all sorts is transported safely, quickly and reliably across the seven seas: steel, paper, wood pellets, salt, scrap, as well as earth, building materials, fertilizer, grain, coal and much more.

Maritime service from one source - Your Plus

- + Full commercial Ship Management
- + Nautical/Technical/ISM Management
- + Competitive Chartering
- + Cargo Brokerage
- + Intermodal logistic and transport solutions
- + Own Terminal handling and warehousing in port of Lübeck
- + Ship Agency & Cruise ship service in port of Lübeck

Our Values: Experience and Trust

Today the Lehmann-Group is diversified in three different sectors: Ship owner & Full Ship Management, Port operator with four own terminals in Lübeck as well as six own ready-mixed-concrete mills in Northern Parts of Germany.

Many years of experience and a solid foundation of trust with our international customers are indispensable for this business. A network comprised of close contacts in all areas of shipping, long-term business relations as well as transparency and fairness when dealing with ship owners, charterers and ship brokers constitute the basis for this.
